José Joel Labrada Carmenate

Front-end Developer.

+3 years of experience in full-stack development, working on both back-end and front-end. Enthusiast of modern web technologies such as HTML, CSS, JavaScript, and libraries/frameworks like React and Astro. Proven ability to work in teams and create high-quality projects.

Experience

Full-stack developer

➔ *2025 · Freelancer, Havana, Cuba.*

RESPONSIBILITIES

- Full development of a hybrid site for a realtor (Real Estate agent) client from USA.

RESULTS

- I designed the pages and project architecture.
- I added messaging services and integrated the site with Strapi CMS
- I deployed the site using Vercel

➔ *2022 - present · XETID, Havana, Cuba.*

RESPONSIBILITIES

- I participated in a development team where I worked on 5 web projects for the "Plataforma Bienestar", focused on managing various procedures (legal, business, company processes, etc.).
- I contributed to the development of functionalities for the "Plataforma Bienestar".
- I collaborated with clients to automate their internal processes and others more focused on service provision (e.g., the Ministry of Justice of Cuba). I performed tasks such as requirements gathering and meetings."

RESULTS

- I implemented solutions with my team, collaborating with over 10 clients.
- I developed some plugins to enhance the framework and the apps we built.
- In my second year working at the company, I was promoted to project leader.
